Your local HR will select the top student to represent your country and inform you

Once you are selected, you will be contacted by the organizing committee for **formal enrollment**

Deadline for application: 15 April 2022

It was **an exceptional experience**. Despite the virtual mode, I got to know many of the other students. I learned to work in a **culturally diverse group**, to contribute to the business case despite the different time zones. Although it only lasted for a week, I **made friends** with my group mates and we still keep in touch. It helped me to **build up a network of contacts that gave me the opportunity to a position in Germany, which I currently hold.** Thanks to AL summer school all of this was possible. I would do it again and again, and **I would suggest it to any new graduate**, because it really **opens a lot of doors**.

Gabriele SAITTA from Italy

Currently a Coordinator Methods & Tools in Air Liquide Germany Summer School 2021 Participant

My 2020 Summer School experience was **thoroughly eye opening** as I had the **opportunity to learn** from some of the young and highly knowledgeable individuals that are leading Air Liquide in various sectors of the organization. I can safely say that Air Liquide is a **multi-faceted**, **multi-cultural** and also a **highly dynamic organization that strives for sustainability and continuous excellence**

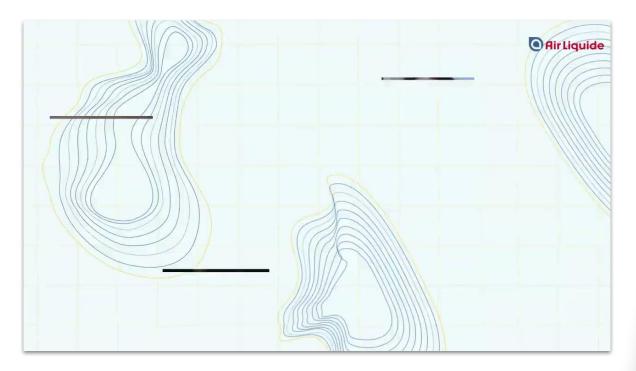

> Neo Venessa Mokonea from South Africa Joined Air Liquide South Africa Graduate Program Summer School 2020 Participant
