

RECYCLING & PROCESS ENGINEERING

for the
FUTURE

Jumpstart Your Career: Join Us as an Intern!

Engineering company HTP GmbH & Co. KG is an independent, owner-managed design and consultancy company for the recycling and renewable energy sectors. Independence, flexibility, and dedication, combined with 30 years of experience and expertise gained at over 100 reference plants, have made HTP the leading engineering service provider in the field of process and plant design for waste management and recycling.

In our head office in **Aachen (Germany)** we are offering an

Internship: Recycling of Solid Waste Streams

40 hr/week

What to Expect:

From the start, we've integrated working students and interns as a core part of our company culture. This is a valuable opportunity to develop both professionally and personally, setting a strong foundation for your future career.

With us, you'll gain industry-specific, hands-on experience and learn about all aspects of our daily work, facilitated by professional teamwork and streamlined communication. Based on your skills and areas of expertise, you'll quickly take on responsibility for specific tasks within our ongoing projects. Additionally, we offer a friendly team and flat hierarchies.

If you are applying from abroad and need to relocate for the duration of the internship, we will provide free housing and moderate allowances on request.

What We're Looking For:

We're seeking students in a technical field, preferably with knowledge in recycling or process engineering. We expect proficiency in MS Office applications, a structured approach to work, and fluency in English. A driver's license and knowledge of the German language are advantageous but not required. The internship has a minimum duration of two months.

Apply now by emailing us your complete application documents.
